

The ability of anaesthetists to identify generic medications from trade names, (A-ANZCA). Bramley DEP. 631.

Abstracts, Australian and New Zealand Intensive Care Society, ASM

A comparison of cardiac output assessment by pulmonary artery catheter and nurse-controlled non-invasive cardiac output device, (A-ANZCS). Corley A.

CUSUM analysis may have detected deteriorating hospital mortality among intensive care patients at the Bundaberg Base Hospital, (A-ANZCS). Pilcher DV, Ernest D, George C, Hart G, Mullany DV. 1009.

Morphine or midazolam infusion doses do not correlate with the amplitude integrated electroencephalograph after infant cardiac surgery, (A-ANZICS), Gunn J, Lavery S, Delzoppo C, McKeever S, Beca J, Shkerdemanian L. 1002.

Redefining ‘tachoeostomy or mechanical ventilation >95 hours’ (AR-DRG A06Z) in intensive care unit: is patient clinical complexity a valid tool to influence risk adjustment?, (A-ANZICS), Marsden K, Turner A, Ratcliffe K, Slatyer M. 1006.

Abstracts, Australian Pain Society, ASD

Spinal cord stimulation versus conventional medical management: a multicentre randomised controlled trial of patients with failed back surgery syndrome (process study), (A-APS). O’Callaghan J. 442.

Anaesthesia, obstetric

Airway, management

Comparison of airway management during anaesthesia using the laryngeal mask airway CTrach™ and Gldescope™, (OP). Ng SY, Ithnin F, Lim Y. 736-742.

Airway, trachea

Airway, tracheostomy—percutaneous

Alcohol

Allergy

Anaesthesia, cardiac

Anaesthesia, dental

Anaesthesia, depth

Anaesthesia, electroconvulsive therapy

Anaesthesia, endoscopy

Anaesthesia, induction

Anaesthesia, neurosurgical

Anaesthesia, obstetric

Anaesthesia, ophthalmological

Effectiveness of superior versus inferior subconjunctival anaesthesia for cataract surgery, (OP). Yuen JS, Prinseas S, Pham T, Lia H. 945-948.

Anaesthesia, orthopaedic

Anaesthesia, otolaryngological

Anaesthesia, outcome

Anaesthesia, paediatric

Anaesthesia, thoracic

Anaesthetic gases, nitrous oxide

Why anaesthetists should no longer use nitrous oxide, (C). McGain F. 808-809.

Anaesthetic intravenous, midazolam

Bispectral index as a predictor of sedation depth during isoflurane or midazolam sedation in ICU patients, (OP). Sackey PV, Radell PJ, Granath F, Martin CL. 348-356.

Anaesthetic intravenous, propofol

Anaesthetic local, bupivacaine

Ropivacaine 0.25% is as effective as bupivacaine 0.25% in providing surgical anaesthesia for lumbar plexus and sciatic nerve block in high-risk patients: preliminary report, (OP). Kocum A, Turkoz A, Ulger H, Sener M, Arslan G. 510-514.

Anaesthetic local, EMLA

Anaesthetic local, lignocaine

Anaesthetic local, ropivacaine

Ropivacaine 0.25% is as effective as bupivacaine 0.25% in providing surgical anaesthesia for lumbar plexus and sciatic nerve block in high-risk patients: preliminary report, (OP). Kocum A, Turkoz A, Ulger H, Sener M, Arslan G. 510-514.
Anaesthetic techniques, regional, fascia iliaca

Anaesthetic techniques, regional, lumbar plexus
Ropivacaine 0.25% is as effective as bupivacaine 0.25% in providing surgical analgesia for lumbar plexus and sciatic nerve block in high-risk patients: preliminary report, (OP). Kocum A, Turkoz A, Ulger H, Sener M, Arslan G. 510-514.

Anaesthetic techniques, regional, psoas
Safety of the psoas compartment block?, (C). Cattano D. 615-616.

Anaesthetic techniques, regional, sciatic nerve
Ropivacaine 0.25% is as effective as bupivacaine 0.25% in providing surgical analgesia for lumbar plexus and sciatic nerve block in high-risk patients: preliminary report, (OP). Kocum A, Turkoz A, Ulger H, Sener M, Arslan G. 510-514.

Anaesthetic techniques, regional, shoulder

Anaesthetic techniques—topical

Anaesthetic techniques, test dose

Anaesthetic techniques—regional, brachial plexus
Peripheral nerve blockade carries only a minimal risk of permanent neurological complications, (E). Schug SA. 11-12.

Anaesthetic techniques—regional, caudal

Anaesthetic techniques—regional, dorsal penile nerve
Ultrasound guided dorsal penile nerve block in children, (CT). Sandeman DJ, Dilley AV. 266-269.

Anaesthetic techniques—regional, epidural

Perioperative epidural anaesthesia and analgesia—an appraisal of its role, (PV). Davies MJ. 593-600.

Prospective audit comparing intrathecal analgesia (incorporating midazolam) with epidural and intravenous analgesia after major open abdominal surgery, (AU). Duncan MA, Savage J, Tucker AP. 558-562.

Anaesthetic techniques—regional, eye

Anaesthetic techniques, intravenous infusion

TIVA: Have you performed a leak test?, (C). Sultana A. 303-304.

Anaesthetic techniques, regional, sciatic nerve
Bispectral index as a predictor of sedation depth during isoflurane anaesthesia, (TAP block, (C). Hebbard PD. 617-618.

Anaesthetic techniques—regional, subarachnoid

Postoperative paraplegia coincident with single shot spinal anaesthesia, (CR). LaFerlita BW. 605-607.

Anaesthetic techniques—regional, transversus abdominis
Audit of “rescue” analgesia using TAP block, (C). Hebbard PD. 510-514.

Anaesthetic techniques, regional, fascia iliaca

Analgesics opioid, remifentanil

Antiemetic
Metoclopramide also acts at serotonin receptors, (C). Murphy EJ. 447.

Arrest, cardiac

Arteries, aorta

Assessment
Medical specialist examinations: item format types and minimising error, (ET). Jones RW. 80-85.

Assessment, preanaesthetic

Audit

Blood, anticoagulants—haemoraphin

Blood, anticoagulation

Blood, haemodilution

Blood, coagulation

Blood, coagulation

Blood, coagulation
Blood, methaemoglobin

Blood, platelets

Blood, sickle cell disease

Blood, transfusion
Anticoagulation, bleeding and blood transfusion practices in Australasian cardiac surgical practice, (SV). Daly DJ, Myles PS, Smith JA, Knight JI, Cavisi O, Bain DL, Glew R, Gibbs NM, Merry AF. 760-768.

Book reviews, title
A Unique Nursing Group—New Zealand Army Nurse Anaesthetists of WW1, (BR). Westhorpe RN. S47.
Clinical Critical Care Medicine, (BR). Heaney M. 993-994.
Get Through FRCA Physics: MCOs, (BR). Donnan GB. 996.
Intracranial Pressure and Brain Monitoring XII, (BR). Myburgh JA. 151-152.

Transesophageal Echocardiography, (BR). Rosse CF. 993.

Brain, blood flow

Brain, haemorrhage

Brain, migraine
Presentation of hemiplegic migraine—hemiplegia and hemisensory loss following general anaesthesia, (CR). Lin L, Adey C. 418-422.

Caesarean section

Carbon dioxide, hypercapnia

Carbon dioxide, partial pressure

Carbon dioxide, tension

Cardiopulmonary bypass

Anaesthesia and Intensive Care

Subject Index Volume 35, 2007

Nitric oxide production is more prominent in off-pump than in on-pump coronary artery bypass surgery, (OP). Mitaka C, Yokoyama K, Imai T. 505-509.

Cardiovascular system
The cardiovascular effects of adrenaline, dobutamine and milrinone in rabbits using pressure-volume loops and guinea pig isolated atrial tissue, (OP). Roys CE, Roys AG, Rohrhlach R, Wright CE, Angus JA. 180-188.

Cardiovascular system, responses

Catecholamine
The cardiovascular effects of adrenaline, dobutamine and milrinone in rabbits using pressure-volume loops and guinea pig isolated atrial tissue, (OP). Roys CE, Roys AG, Rohrhlach R, Wright CE, Angus JA. 180-188.

Chemotherapy

Communication

Complementary medicine

Complications, airway
Comparison of the AMBU® Laryngeal Mask and the LMA Classic in anaesthetised, spontaneously breathing patients, (OP). Ng SY, Lim Y, Cheong VG. 57-61.

Complications, allergy

Complications, anaphylaxis

Complications, atelectasis

Complications, barotrauma
Tension pneumoperitoneum, pneumomediastinum, subcutaneous emphysema and cardiorespiratory collapse following gastroscopy, (C). Tam WY, Bertholoni D. 307-309.

Complications, cardiac

Complications, cardiac arrest

Re: Cardiac arrest during continuous popso compartment block for hip surgery, (CR). Peady CJ. 615.

Re: Cardiac arrest during continuous popso compartment block for hip surgery—Reply, (C). Zachette G. 615.

Ropivacaine-induced cardiac arrest, (C). Berry FR. 446.

Ropivacaine-induced cardiac arrest—Reply, (C). Khoo LPY, Corbett AR. 446.

Complications, catheter migration

Complications, catheter misplacement

Complications, diabetes insipidus

Complications, drug

Complications, equipment
Fractured spike of needle-less InterLink™ Vial Access Cannula, (C). McCabe SET. 991-992.

Complications, eye

Complications, haemodynamic

Complications, hyperglycaemia

Complications, hypertension

Complications, infusion

Complications, ischaemia

Complications, neurological
Delayed atypical headache in a primigravida following a caesarean section under regional anaesthesia and failed epidural, (C). Shivanna S, kuselan b, O’Donohoe B, Jayaraju K. 809-810.

Peripheral nerve blockade carries only a minimal risk of permanent neurological complications, (E). Schug SA. 11-12.

Postoperative paraplegia coincident with single shot spinal anaesthesia, (CR). LaFerlita BW. 605-607.

Presentation of hemiplegic migraine—hemiplegia and hemi-sensory loss following general anaesthesia, (CR). Lin L, Adey C. 418-422.

Complications, pain

Complications, pneumothorax

Complications, postoperative

Complications, pulmonary oedema
Operative non-cardiogenic pulmonary oedema and pancreatic carcinoid tumour, (C). Mraushall M, Boussofara M, Bousen H, Rahal K. 139-140.

Complications, ventilation

Computer

Consent
Perioperative epidural anaesthesia and analgesia—an appraisal of its role, (PV). Davies MJ. 593-600.

Counterpulsation

Cover note
Desflurane, (CN). Ball C, Westhorpe RN. 657.
Enflurane, (CN). Ball C, Westhorpe RN. 325.
Halothane, (CN). Ball C, Westhorpe RN. 3.
Isoflurane, (CN). Ball C, Westhorpe RN. 467.
Methoxyflurane: then and now, (CN). Ball C, Westhorpe RN. 161.
Sevoflurane, (CN). Ball C, Westhorpe RN. 835.

Death

Combining Sequential Organ Failure Assessment (SOFA) score with Acute Physiology and Chronic Health Evaluation (APACHE II) score to predict hospital mortality of critically ill patients, (OP). Ho KM. 515-521.

Outcome of patients who have therapy withheld or withdrawn in ICU, (OP). Lewis JP, Ho KM, Webb SAR. 387-392.

The history of anaesthetic mortality reporting, (H). Fenwick DG. 521-525.

Dependence

Dialysis, renal

Drug delivery, computerised

Drug delivery, intravenous

Drug delivery, subarachnoid

Editorial

Epidural vs. multimodal analgesia for colorectal laparotomy, (E). Gibbs NM. 171-172.

Peripheral nerve blockade carries only a minimal risk of permanent neurological complications, (E). Schug SA. 11-12.

Thoughts about thinking: the challenge for EBM and medical education, (E). Robertson MS. 665-666.
