Anaesthetic techniques—regional, brachial plexus
A novel approach to locate the suprascapular nerve in a patient with a shoulder tumour: the specular symmetry technique, (C). Cesar M, Alicki HA, Erdem AF, Dostbil A. 121-123.

Anaesthetic techniques—regional, cervical plexus

Anaesthetic techniques—regional, complication

Anaesthetic techniques—regional, epidural
“Just put it in!” Consent for epidural analgesia in labour, (E). Paech MJ. 147-149.
Prediction of successful epidural catheter placement by ‘cold test’, (C). Berry FR. 519.

Anaesthetic techniques—regional, femoral

Anaesthetic techniques—regional, paravertebral

Anaesthetic techniques—regional, scalp

Anaesthetic techniques—regional, subarachnoid

Anaesthetic techniques—regional, sub-Tenon

Anaesthetic techniques—regional, ultrasound

Anaesthetic techniques—subcutaneous

Anaesthetic techniques—topical

Anaesthetic volatile, desflurane

Anaesthetic volatile, sevoflurane
The relationship between calculated effect-site sevoflurane levels and awakening from anaesthesia, (OP). Kennedy RR, Sakowska MN. 713-718.

Anaesthetist

Anaesthetist, activity
Fatigue and the anaesthetist, (E). Merry AF, Warman GR. 577-578.

Anaesthetist, attitudes

Anaesthetist, risks

Analgesia, obstetric

Analgesia, postoperative

Analgesic techniques, extradural

Analgesic techniques, infusion

Analgesic techniques, patient controlled—intravenous

Analgesic techniques, subarachnoid
An audit of intrathecal morphine analgesia for non-obstetric post-surgical patients in an adult tertiary hospital, (AU). Lim PC, MacIntyre PT. 776-781.

Analgesics opioid, morphine
An audit of intrathecal morphine analgesia for non-obstetric post-surgical patients in an adult tertiary hospital, (AU). Lim PC, MacIntyre PT. 776-781.

Analgesics opioid, remifentanil

Analgesics opioid, tramadol

Analgesics other

Analgesics other, alpha2 agonist

Anatomy, brachial plexus

Arrest, cardiac
Successful resuscitation of an ASA 3 patient following ropivacaine-in-

**Arrest, respiratory**

**Assessment, preoperative**

**Audit**

**Blood, anaemia**

**Blood, anticoagulants—heparin**

**Blood, coagulation**

**Blood, coagulopathy**

**Blood, erythropoietin**

**Blood, methaemoglobin**

**Blood, transfusion**

**Book reviews, title**

Anesthesia for Congenital Heart Disease, (BR). Baines D. 129.

Australia’s First Anaesthetic Department—75 Years at the RPA, (BR). Clarke GM. 46.

Critical Care Toxicology: Diagnosis and Management of the Critically Poisoned Patient, (BR). Erickson S. 128-129.

CRPS: Current Diagnosis and Therapy, (BR). Cherry DA. 286-287.

Evidence-Based Obstetric Anaesthesia, (BR). Chester S. 286.

**Brain, meningitis**

The yield of lumbar puncture to exclude nosocomial meningitis as aetiology for mental status changes in the medical intensive care unit, (OP). Jackson WL, Shorr AF. 21-24.

**Cardiopulmonary bypass**

Two cases of heparin induced thrombocytopenia type II post cardiopulmonary bypass, (C). Husedzicnovi I, Bradic N, Nikic N, Barisin S, Desnica M. 124-125.

**Cerebrospinal fluid**

The yield of lumbar puncture to exclude nosocomial meningitis as aetiology for mental status changes in the medical intensive care unit, (OP). Jackson WL, Shorr AF. 21-24.

**Children**

Adenotonsillar surgery in morbibly obese children: routine elective admission of all patients to the intensive care unit is unnecessary, (OP). Shine NP, Coates HL, Lannigan FJ, Duncan AW. 724-730.

**Clinical trials**

**Complications, airway**

**Complications, airway obstruction**

**Complications, arrhythmia**

Complications, atelectasis
Pulmonary atelectasis following spinal anaesthesia for caesarean section, (CR). Wong AYC, Fung LNY. 687-688.

Complications, awareness

Complications, cardiac

Complications, catheters central venous

Complications, coagulopathy

Complications, Jehovah’s Witness

Complications, embolism
Massive intraoperative pulmonary embolism: it may not be as bad as it looks…, (CR). Forrest P, Sutton B. 510-513.

Complications, equipment

Complications, eye

Complications, haemorrhage

Complications, hyperglycaemia
A comparison of 5% dextrose in 0.9% normal saline versus non-dextrose-containing crystallisols as the initial intravenous replacement fluid in elective surgery, (OP). Chin KJ, Macachor J, Ong KC, Ong BC. 613-617.

Complications, hypotension

Complications, hypovolaemia

Complications, infection

Complications, Jehovah’s Witness

Complications, malignant hyperthermia

Complications, neurological

Subdural spinal haematoma after epidural anaesthesia in a patient with spinal canal stenosis, (CR). Chan MYL, Lindsay DA. 269-276.

Complications, pacemaker
Another case of monitor-induced pacemaker-driven tachycardia: if in doubt, read the instructions, (C). Hodgson B. 517.

Complications, pneumoperitoneum
Failure to recognise tension pneumoperitoneum during resuscitation, (CR). Ternland S, Brock-Unite JG. 517-518.

Complications, pneumothorax

Complications, pulmonary oedema

Complications, renal

Complications, respiratory

Complications, thrombosis

Complications, transfusion

Computer

Consent
“Just put it in!” Consent for epidural analgesia in labour, (E). Paech MJ. 147-149.

“Just put it in!” Consent for epidural analgesia in labour, (C). Rosen M. 519-520.

Cover note
Cyclopropane, (CN). Ball C, Westhorpe RN. 701.

Muscle relaxants—pancuronium and vecuronium, (CN). Ball C. 137.

Muscle relaxants—reversal agents, (CN). Ball C, Westhorpe RN. 415.

Muscle relaxants—suxamethonium and THA, (CN). Ball C. 3.

Death

Developing country

Disaster

Editorial
“Just put it in!” Consent for epidural analgesia in labour, (E). Paech MJ. 147-149.

Case reports or correspondence?, (E). Gibbs NM. 11.

Education and training in anaesthesia and intensive care—contemporary considerations, (E). Duncan AW. 426.

Fatigue and the anaesthetist, (E). Merry AF, Warman GR. 577-578.

Progress at the Journal, (E). Duncan AW. 145-146.

The vale the index, (E). Cooper MG, Morris RW. 711-712.

Education
Education and training in anaesthesia and intensive care—contemporary considerations, (E). Duncan AW. 426.

Education, anaesthesia

Education, intensive care

Education, junior staff
Increasing the use of an existing medical emergency team in a teaching hospital, (OP). Jones D, Mitra B, Barbetti J, Choate K.
Gastrointestinal tract, ischaemia

Guidelines

Health management, clinical practice
Outcomes following a shortage of high dependency unit beds for surgical patients, (OP). McIlroy DR, Coleman B, Myles PS. 457-463.

Health management, manpower

Health management, practice management

Health management, quality assurance
Failure of a quality improvement process to increase nutrition delivery to intensive care patients, (OP). Ferrie S, McWilliam D. 191-196.

Health management, workforce

Heart, cardiac output

Heart, failure
B-Type natriuretic peptide concentrations and myocardial dysfunction in critical illness, (R). Sturgess DJ, Marwick TH, Joyce C, Venkatath B. 151-163.

Heart, myocardial blood flow

Heart, pacemakers artificial

Heart, peptides
B-Type natriuretic peptide concentrations and myocardial dysfunction in critical illness, (R). Sturgess DJ, Marwick TH, Joyce C, Venkatath B. 151-163.

Heart, transplantation

Heart, ventricles
B-Type natriuretic peptide concentrations and myocardial dysfunction in critical illness, (R). Sturgess DJ, Marwick TH, Joyce C, Venkatath B. 151-163.

High dependency
is ‘more’ always ‘better’? moving towards optimal utilisation of high dependency and intensive care beds by selecting the right patients for admission, (E). Joynt GM, Gomersall CD. 423-425.
Outcomes following a shortage of high dependency unit beds for surgical patients, (OP). McIlroy DR, Coleman B, Myles PS. 457-463.

History, anaesthesia
Some observations on early military anaesthesia, (H). Houghton IT. S6-S15.
The contribution of newspapers and their advertisements to the history of colonial anaesthesia, (H). Newson AJ. S39-S45.
The inventors, (H). Holland R. S33-S38.

History, anaesthesia—inhalation
Cyclopropane, (CN). Ball C, Westhorpe RN. 701.

History, book
Australia’s First Anaesthetic Department—75 Years at the RPA, (BR). Clarke GM. 46.

History, drug
Cover note article on the muscle relaxants suxamethonium and THA, (C). Rechtman I. 524-525.
Cyclopropane, (CN). Ball C, Westhorpe RN. 701.
Muscle relaxants—pancuronium and vecuronium, (CN). Ball C. 137.
Muscle relaxants—reversal agents, (CN). Ball C, Westhorpe RN. 415.
Muscle relaxants—suxamethonium and THA, (CN). Ball C. 5.

History, equipment
Some observations on early military anaesthesia, (H). Houghton IT. S6-S15.
The inventors, (H). Holland R. S33-S38.

History, pain

History, people
Some observations on early military anaesthesia, (H). Houghton IT. S6-S15.
The inventors, (H). Holland R. S33-S38.

History, technique
Some observations on early military anaesthesia, (H). Houghton IT. S6-S15.

Hormones, vasopressin
Adenotonsillar surgery in morbidly obese children: routine elective admission of all patients to the intensive care unit is unnecessary, (OP). Shine NP, Coates HL, Lannigan FJ, Duncan AW. 724-730.

Intensive care, resources

Interactions—drug

Interleukin
Endotoxin stimulated interleukin-10 production is enhanced by adenosine. Possible key to septic shock associated immune deficiency?, (OP). Nelos M, Huang SJ, Pandit R, McLean AS. 719-723.

Intubation, difficult

Multiple sites of impingement of a tracheal tube as it is advanced over a fiberoptic bronchoscope or tracheal tube introducer in anaesthetised, paralysed patients, (OP). Jackson AH, Orr B, Yeo C, Parker C, Craven R, Greenberg SL. 444-449.

Intubation, fibroscopy
Multiple sites of impingement of a tracheal tube as it is advanced over a fiberoptic bronchoscope or tracheal tube introducer in anaesthetised, paralysed patients, (OP). Jackson AH, Orr B, Yeo C, Parker C, Craven R, Greenberg SL. 444-449.

Intubation, technique

Intubation, tracheostomy

Investigation, mast cell tryptase

Journals
Case reports or correspondence?, (E). Gibbs NM. 11.
Progress at the Journal, (E). Duncan AW. 145-146.
Evidence-based medicine
Relationship between impact factor and levels of evidence in anaesthesia—Reply, (C). Bain CR, Myles PS. 522-523.
Relationship between journal impact factor and level of evidence in anaesthesia, (C). Lau A. 522.

Lung, haemorrhage
Pulmonary arteriovenous malformation causing massive haemoptysis and complicated by coronary air embolism, (CR). Loki GPY, Story DA, Liskaser F, Seenavayagam S. 75-78.

Lung, mechanics

Lung, pneumothorax

Lung, trachea

Malignant hyperthermia
